$$\tan \theta = \frac{d_1}{d_2}$$

$$\frac{\frac{d_1}{\sin \theta}}{2} = r$$

$$\sin \theta = \frac{d_1}{h}$$

$$h = \frac{d_1}{\sin \theta}$$

$$\cos \theta = \frac{h/2}{r}$$

$$r = \frac{h/2}{\cos \theta}$$

$$r = \frac{d_1}{2 \sin \theta \cos \theta}$$

Dear Sirs

~~As professional photographers we will be visiting~~
We will be visiting your country in 1979-1980. As professional photographers we are concerned about the availability of 35MM slide film. In order to keep ourselves supplied with a flow of fresh film, we seek your assistance. Would it be possible for you to hold a package of 35MM bulk slide film (safely) for us until claimed ~~to~~ by us? In effect we will be mailing film to ourselves in advance to be claimed retrieved at a later date.

Please notify us if such a plan is not feasible so that we may make other arrangements.
